

PAYSTATION

Unattended payment terminal.

open 24 hrs a day, 7 days a week!

The Quest PayStation has been specifically designed for use in both supervised and unattended environments, whether indoors or outdoors.

Easily integrated into self-service devices such as kiosks, petrol dispensers and ticketing machines, the PayStation also allows multiple software applications to coexist securely in the device.

TAKE CUSTOMER SERVICE TO THE NEXT LEVEL

A member of the popular Swift™ terminal range, the Quest PayStation™ payment terminal provides an off-the-shelf solution to enable secure debit and credit card payments in both unattended and semi-supervised customer environments. Its environmental design allows for indoor and outdoor integration into devices such as kiosks, parking meters, vending machines, ticketing machines, or virtually any self-service device requiring real time payment processing.

RELIABILITY

Highly reliable design means less downtime and lost sales. The PayStation has been tested to withstand the harshest of environmental conditions including temperatures of up to 60°C. With weather and vandal resistant components, the PayStation gives you the confidence to place your solution wherever it will drive the most revenue.

TERMINAL INTEGRATION

Integrated with Quest’s EftposPlus Enterprise™ or EftposPlus Express™ middleware for Windows and Linux, or interfaced directly into legacy or non-PC solutions, the PayStation delivers a fast and flexible solution for connection to your acquirer.

ABOUT QUEST

Quest Payment Systems is a market leading technology company providing a diverse portfolio of products in the international retail and financial services industry. All Quest products are designed and manufactured locally in Australia - from fully integrated EFTPOS solutions to unattended kiosks, gift cards and secure enterprise terminal management applications.
